

TrafficCamera

AZD8M40-102F15V4

TrafficCamera is an outdoor dome camera with **on-board video analytic engine FLOW**. It is an all-in-one **edge solution** enabling every feature of a distributed video-analytics environment for **smart traffic, parking, retail or security**. Thanks to the local processing and dynamic anonymization it is **100% GDPR compliant** and has small bandwidth requirements.

The TrafficCamera is affordable, easy to set up and a highly reliable **multipurpose sensor** supporting **event based alerts** and **triggers**. Thanks to the **open API** it can be easily integrated with 3rd party **smart city systems and data platforms**. Connection and power are achieved with **POE**, and the camera is equipped with **IR** with a max distance of 15 meters for better low light vision and a fully motorized zoom allowing easy adjustment of the field of view from 40° to 102°. The camera also has **automatic updates** and can be configured remotely. Discover the next generation of **actionable video intelligence** packed into a single extremely versatile product - the TrafficCamera; your **plug and play sixth traffic sense**.

Applications

TrafficCamera is an ideal choice for monitoring smaller areas or not so complex scenes such as two-lane roads, tunnels, pedestrian paths, entries or exits etc. Thanks to an onboard fully featured video analytic engine capable of processing and evaluating the extracted traffic data in a fully customizable way, it can send real-time alerts or directly control other connected devices including signs or gates. All statistics could be visualized on a camera dashboard. It is a fully functional stand-alone traffic monitoring solution without the need of a server-side part of its operation.

Traffic violations detection

- wrong-way driving
- illegal lane change
- blocking vehicle detection

Safety & security

- object presence alert
- suspicious behaviour detection

Parking

- occupancy
- parking time
- wrong parking

Traffic flow improvement

- congestion detection
- level of service measurement
- traffic statistics

Retail

- queue detection
- heatmaps, stationary time
- measuring of attractiveness

General:

- behavioural analysis
- counting / statistics
- occupancy / presence data

Powered by FLOW, the most powerful traffic framework

FLOW is a fully interactive video analytical traffic framework designed for real-time driven applications. It is the fastest and the most efficient way to transform any video stream into a stream of actionable insights. The first tool ever which visualizes traffic data live right at your fingertips and communicates with the other parts of your smart infrastructure using open APIs. FLOW is built for all imaginable traffic scenarios thanks to the powerful combination of unique visual traffic programming language, trajectory-driven design and AI-based image processing. Take the advantage of the one unified solution for smart traffic, parking, retail and security, which runs everywhere.

Video detection features

FLOW is powered by a proprietary developed and globally trusted video analytical engine utilizing deep-learning. This engine is capable of detecting and tracking hundreds of objects in multi-camera environments simultaneously.

Interactive data visualization

FLOW allows you to visualize the extracted information and analyses using interactive widgets on the customizable dashboards. Create a beautiful live visualization of the current traffic situation composed from the histograms, heat-maps, trajectory views, graphs and other graphical elements.

Traffic analysis functions

FLOW supports various traffic analytic functions and operators that can be combined into a comprehensive traffic analysis running in real-time. Thanks to the unique visual traffic programming language, you become the designer of a monitoring solution tailored to your specific needs.

Data interfaces

FLOW was born for integration with other parts of smart infrastructure. Any type of extracted traffic insights can be continuously delivered to 3rd party systems using an open API which supports multiple communication protocols including UDP and REST.

Model

TrafficCamera – AV

Description

On-Board processing TrafficCamera
8MP H.265
Low Lux HDR
Vandal-Proof

Camera – general

Processor	Qualcomm QCS605
RAM Memory	4GB
Storage memory	16GB
Power Supply	12V DC /24V AC/ POE+ (IEEE 802.3at) (max consumption 25.5W)
Image Sensor	1/1.8" progressive scan low lux CMOS
Picture Elements	3840 (H) x 2160 (V)
Minimum Illumination	0.025 Lux @F1.47 (Color), 0.02 Lux @F1.47 (B/W), 0 Lux (IR ON)
HDR/WDR	120 dB
Regulatory	CE, FCC,VCCI compliant, RoHS compliant, IP67, IK10, RCM, LVD
Dimensions	ø146.7 x 127.8 mm (5.77 x 5.03 in)
Weight	1,172 kg (2.58 lb)
Micro SD	supports 1x Micro-SD; SD, SDHC, SDXC UHS-I (16GB to 256GB); Class 10 or higher
LED Indicator	3 LEDs: Power, Status, Ethernet

Storage, startup and operating conditions

Storage temp.	-30 °C ~ 60 °C (-4 °F ~ 140 °F)
Storage humidity	10% ~ 90% (no condensation)
Startup temp.	-20 °C ~ 60 °C (-4 °F ~ 140 °F)
Operating temp. (IR off)	-30 °C ~ 60 °C (-22 °F ~ 140 °F)
Operating temp. (IR on)	-30 °C ~ 50 °C (-22 °F ~ 122 °F)
Operating humidity	10% ~ 90% (no condensation)

Video capture parameters

Video Compression	H.265, H.264, MJPEG
Frame Rate	30 fps at 3840 x 2160
Audio Compression	G.711

Network and connectivity

Interface	10/100 Ethernet
Protocols	TCP, UDP, DHCP, DDNS, HTTP, HTTPS, RTSP, SMTP, AMQP
Ethernet	1x10/100/1000Base-T, RJ-45 port
Audio	Line in/Line out
Digital I/O	1 Input (Dry Contact), 2 Digital Output (Wet Contact)
Security	Password protection, HTTPS Encryption Basic, Digest Authentication for HTTP/HTTPS WSSE, Digest authentication for ONVIF, TLS 1.2

Lens

Day/Night	Automatic, Schedule
Lens Type	Motorized, Vari-focal and Remote focus
Focal Length	4.76 ~ 11.04 mm ± 5%
Maximum Aperture	F/1.47
Horizontal/Vertical FOV	FOV 102° ~ 40°/53° ~ 22°
Image Format	1/1.8"
Max. IR Distance (Radius)	15 m (49.21 ft)

Video Analysis Functions

- Detection and tracking of objects
- Category classification into 9 object types
- Detection scale of 512x320 pixels
- Minimum object size required for detection - 32x32 pixels in detection scale

Traffic analytics & visualization functions

- Fully programmable trajectory processing and evaluation thanks to the FLOW framework.
- Speed and stationary time measurement
- Customizable OpenAPI - REST/UDP/JSON format + Webhooks
- Customizable dashboards with interactive widgets
- Color recognition
